

THE OKLAHOMA STATE TENNIS TEAMS ARE WINNING MORE AND PRACTICING SMARTER WITH PLAYSIGHT TECHNOLOGY.

Chris Young - Director of Tennis, Women's Head Coach

"It has been an amazing tool for us to have PlaySight, and no coincidence that we won the Big 12 title using it this year."

Matt Manasse - Assistant Coach, Women's Tennis

"I really like the fact that we can instantly show the girls what we're seeing, and they get to see it themselves.

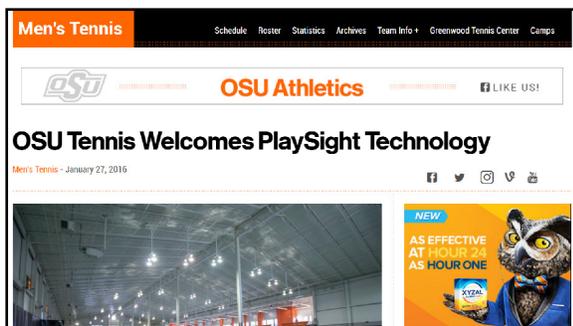

I was.... hitting with [a player]. We were doing a forehand drill, and we can go and look at it in the 3D view, and she notices that every time she is hitting it she is stepping backwards. So if she notices it, and we're saying it, she is more likely to respond, and respond quicker.

I had another girl... watching the video. She saw herself not being planted, and instantly went over on the other court and fixed the problem by herself.

It's allowing [the players] to see stuff that we see, and it's just allowing for a quicker change for them to understand what's going on and how it's working for them. It's [also] allowing us to put the players through a lot of repetitions in a more competitive environment. Now there's numbers and stuff like that, they can feel that competition and pressure, which is going to help in the long run when they are in their matches."

Jay Udwardia - Men's Tennis Head Coach

"It is very easy to use and the data that you get is very simple, but at the same time, very helpful. Practice is more productive, because you are concentrating and trying to beat those goals. It makes you practice sharper and more intensely. I always like to see where the players are moving, and where the ball is landing. It adds a little bit more excitement in your practice."
